Mannheim Health Clinic

MAJ KRISTAL BRYANT

Army Public Health Nurse

What We Know

- To date, most people with H1N1 have been experiencing mild to moderate flu symptoms
- Currently experiencing a decrease in the number of cases. This could change quickly, so preventive measures should still be enforced.
- Department of Defense (DOD)/ Army are closely monitoring the health of our military family to gauge the impact from this virus
- To date, H1N1 has had minimal operational impact for DOD/ Army

**Centers for Disease Control & Prevention (CDC)*

What We are Currently Doing

1. Seasonal Flu Vaccine: Available now at MHC
2. H1N1 vaccine:
   - Given in addition to the seasonal influenza vaccine
   - Currently available for all uniformed personnel and beneficiaries ages 6 months and up who have a high risk medical condition (i.e. asthma, diabetes, pregnancy, heart or lung disease and cancer).

What We Recommend

1. Get vaccinated as soon as possible.
2. Continue to take these everyday steps to protect your own and others' health: *
   - Sneeze and cough into a tissue and throw it away; if no tissue available, sneeze/cough into sleeve instead of hands
   - Wash hands often with soap and warm water or use alcohol-based hand cleaners frequently
   - Avoid touching your eyes, nose or mouth
   - Try to avoid close contact with sick people
   - Stay home if you are sick
